The location of the passage controls will be published by means of a bulletin.

The lack of a stamp on a passage control will imply a penalty of 5 minutes.

The fact of not passing on a passage control will imply a penalty of 2 hours.

21.3 Closing time of the passage controls

The closing time of the different passage controls will be calculated as follows:

$$T_n = T_o + T_m + 60 \text{ minutes}$$

T_n: Closing time of the control "n"

T_o: Starting time of the last vehicle

T_m: Maximum time at control "n" calculated on the basis of the distance from the start of the selective section and the minimum average speed established for the same selective section.

For each crew, the calculation of a passage control closing time will be based on the starting time of the crew for that selective section (**T_o**: Starting time of the crew).

21.4 Intersection Controls

Controls will be set up in the intersection with asphalt roads or heavy traffic country lanes. These controls will be signaled as '**CC**'.

Crews must respect the signs made by the marshals in post who may show a stop sign, in which case the crew must stop the vehicle before the intersection. Any crew failing to comply will be subject to a penalty at the Stewards discretion.

Any crew presenting themselves at a CC in a direction different from the one in the road book will be penalized as if in a control zone.

23.4 Provided that the results have become final and the stewards have authorised the Parc Fermé to be opened, all cars must be removed from Parc Fermé at the latest by 22H00 on Saturday, 27 October.

Only upon presentation of the Parc Fermé pass issued at TC4B may a car be removed from the Parc Fermé by the drivers or their representatives.

Control devices and functions

STELLA III is equipped with two small monitors: – LED'S Array
– LCD Monitor

STELLA III doesn't have an ON – OFF switch. This action is only performed by the Control Centre. The device must be installed in such way that the buttons can be reached by crew members, even wearing seat belts.

On the rear panel, you will find 4 connectors.

White: IRIDIUM Blue: GPS
No colour: RF 12 volt
(+-)

The LED monitor indicates alerts such as breakdown, speed zone, overtaking and emergencies (SOS). On the LCD monitor, you will find an Odometer, Speed, Cap, warnings and validation of virtual check points.

Safety instructions

1. Mechanical Failures

In case of a mechanical failure or risk situation, you must press the red button for 3 seconds at your STELLA III. A triangle with flashing yellow light will appear at your led monitor.

Competitors approaching your vehicle with mechanical failure will receive an alert on their led monitor, a symbol in the shape of flashing red triangle and an alert sound or a beep when they are within 300m of the damaged vehicle.

These alerts will inform the competitors that they are approaching a vehicle with some mechanical failure or rollover inside or outside of the track, to take all the necessary precautions while driving to prevent any accident.

In case your vehicle gets repaired, you can deactivate the alert by pressing the green button at your STELLA III. If you happen to forget this action, the alert will turn off when your vehicle reaches 20 km/h.

All vehicles passing through breakdown vehicle area will turn off the alert on their monitor.

2. Speed Zone

When vehicles approach to a speed zone, STELLA III will show them the maximum speed on the LEDS monitor in flashing yellow. This warning system will be activated 100m before approaching the speed zone.

Upon entering the speed zone, the speed limit will change from flashing yellow to steady red color on your LEDS monitor.

If you exceed the speed limit of that area, the number in red color will begin to flash. Once you are out of that speed zone, the number will disappear from your monitor.

STELLA III generates reports of speed violations, these reports are sent immediately to the control center and delivered to the race management, who will apply the corresponding penalizations.

3. Overtaking

<p>When approaching another vehicle at an average distance of 200m with a chance of passing, you must press the blue button at your Stella III to ask for the pass.</p>	
<p>Your LEDS monitor will flash in yellow colour to indicate that the vehicle you are attempting to pass has not received your request for passing. When the yellow monitor stops flashing, it indicates that the vehicle ahead has already received your request for passing.</p>	
<p>Your request has sent an alert to the vehicle ahead and his LEDS monitor will start flashing blue, followed by an alert sound or beep. This condition will continue until the competitor ahead authorizes the pass.</p>	
<p>When the competitor ahead considers passing is appropriate and safe. He must press the blue button. This action will turn off the alert sound and his LEDS monitor in blue colour will change from being flashing to steady.</p>	
<p>This will indicate that your request for passing has been accepted and the word "GO" in green colour will appear on your LEDS monitor.</p>	

At the moment you will be able to pass in a safe way. This generates immediate reports and, in case of block that impedes passing, the race management will be informed. It is not recommended to overtake or pass if the word "GO" doesn't appear on your monitor.

4. SOS Alert

STELLA III has a very useful tool for emergency cases of participants or spectators. You can activate this tool by pressing the red and blue buttons at the same time. An SOS signal will appear in the LEDS monitor immediately.

If you press the green button "OK", we will assume that everything is ok and we won't send rescue service. All the participants approaching 300m of a competitor who injured and asked for medical assistance, will see on their LEDS monitor an "SOS" symbol.

If another racer stops next to the vehicle with SOS to help the injured person, in case of life or death and activate the SOS buttons at his STELLA III, we will understand that he is providing assistance and the time spent helping will be deducted from their race time.

Let's remember that human life is first, and we value life so much.

5. OK?

Clerk of the course may ask you the current status of the participant. Green "OK" appears on the monitor with the acoustic signal.

Press the green button in case that there is no injury or activate SOS (pressing RED + BLUE) to request medical attention immediately.

6. Danger Zone

When approaching a danger zone in the track, at a distance of 200m, STELLA III will send you an alert on your LEDS monitor with a !!!3 symbol in red colour, flashing followed by an alert sound or beep
